Address: Den Haag, Netherlands

LinkedIn: <https://www.linkedin.com/in/ericxdev>

Frontend-focused software engineer with over 5 years of experience across diverse industries. Driven by curiosity, committed to clean, maintainable code, and passionate about turning ideas into real-world products that deliver meaningful value.

EXPERIENCE

• Software Engineer

Rotterdam, Netherlands

Mendix (Siemens) - Low-code platform.

Oct 2025 - Present

- Modernized the Domain Model Editor by migrating it from a legacy CSharp implementation to a scalable, web-based architecture, significantly improving extensibility and long-term maintainability.
- Enhanced the Mendix OQL Monaco Editor by extending an ANTLR4-based query language to support parameters, comments, and additional syntax features, improving query expressiveness and developer experience.
- Collaborated on the built-in AI agent (Maia) to assist users within the Domain Model Editor, enabling more efficient modeling workflows through contextual, in-editor AI guidance.
- Regularly contributed to the shared core library, driving adoption across multiple teams and improving code reuse, consistency, and development efficiency at scale.

Technology stack: TypeScript, Node.js, Vite, Vitest, CSharp, React, CI/CD, AWS

• Innovation Engineer

Nootdorp, Netherlands

Fugro - Global leader in geo-data for infrastructure and energy projects.

Jul 2024 - Jul 2025

- Co-developed a portal to process seismic datasets into high-fidelity 3D models and interactive visualizations.
- Contributed to system architecture design using AWS Infrastructure as Code (IaC).
- Drove requirement definition and user journey design in collaboration with the product manager.
- Contributed to the development and refinement of an internal design system.

Technology stack: TypeScript, Python, React, Storybook, AWS CDK, Azure, Docker, Playwright

• Senior Frontend Engineer

Hangzhou, China

Hithink RoyalFlush - Leading fintech company in China for investment and trading.

Jul 2023 - Nov 2023

- Teamed up with engineers to deliver hybrid (web/mobile) applications supporting over 10 million users in the financial sector.
- Collaborated with DevOps to streamline build and deployment processes for faster, more reliable product delivery.
- Worked on an internal UI component library and Backend-for-Frontend (BFF) service to unify interfaces and accelerate feature development.

Technology stack: TypeScript, Node.js, React, Vue3, Next.js, Tailwind, Jest, Docker

• Full-stack Engineer

Shanghai, China

Shanghai WUPEN Universe - Top-tier urban planning organization in China.

Dec 2021 - Jan 2023

- Developed and launched a community platform for spatial planning students, supporting learning, discussion, and participation in the National Design Competition, with peak daily traffic exceeding 10,000 users.
- Led a frontend team of four, responsible for system architecture, technical guidance, and ensuring timely project execution.
- Improved system performance by reducing frontend bundle size and optimizing backend APIs and caching, leading to faster load times and better UX.
- Led the design and development of an innovative virtual 3D exhibition hall that effectively showcased graduation projects from the design institute with smooth performance.

- Implemented CI pipelines using GitLab and automated deployment to Alibaba Cloud, ensuring strict environment isolation.

Technology stack:

TypeScript, Nuxt.js, Vue3, Webpack, Django, PostgreSQL, CI/CD, Flask, Python, Docker, Alibaba Cloud, Three.js, Java, PHP

- **Junior Frontend Engineer** Shanghai, China
Shuli Information Technology Co., Ltd. - IT consultant and service startup *Dec 2020 - Nov 2021*

- Contributed to the development of over 10 enterprise management platforms, including CMS solutions, logistics, and smart park management systems.
- Leveraged data visualization libraries to create dynamic charts, display geospatial data, and monitor real-time metrics.
- Abstracted reusable components to create a generic admin template, speeding up development for similar business applications.

Technology stack:

TypeScript, React, Vue, TailwindCSS, GraphQL, jQuery, D3.js, ECharts, PHP, Node.js

EDUCATION

- **Monash University** Melbourne, Australia
Master of Information Technology *Sep. 2018 – Nov. 2020*
- **Dalian University of Technology** Dalian, China
Bachelor of Engineering in Industrial Design *Sep. 2013 – Jun. 2017*
